HyPro™ System

HyProBlue®

HyProBlue is a high performance, trivalent passivate for zinc electrodeposits. **HyProBlue** will provide over 100 hours of corrosion resistance to electrodeposited zinc per ASTM B 117. **HyProBlue** is designed to meet the corrosion protection requirements of all automotive specifications requiring the elimination of hexavalent chromium from chromate conversion coatings.

- ❖ Exceeds 100 hours to white salts without the use of topcoats
- ❖ Exceeds 250 hours to white salts with the use of **HyProCoat 320**
- ❖ Can be baked without degradation of corrosion resistance
- ❖ ELV, RoHS, and WEEE compliant
