New Product: **Non Chrome Black Passivate**

Pavco Inc. of Charlotte North Carolina, USA, a formulator and distributor of metal finishing chemistry announces the release of a revolutionary non chrome black passivate for zinc plated parts. The processes, **HyProNC Black 600 CL** and **HyProNC Black 650 ALK** are expected to gain rapid and extensive use. The global market has been seeking a chemistry that meets the requirements provided by the newest member of the **HyPro** line of **Pavco** chemistries.

Pavco's **Compliant Chemistry Division**, which deals globally with the requirements of directives such as **RoHS and ELV** is excited to have HyProNC Black as the newest member of its' HyPro line of **environmentally compliant chemistries**. "This product fills a much needed void in our ever growing line of HyPro products", according to Lee Swope, Global Manager of Pavco's Compliant Chemistry Division.
